Green Bay, Wisconsin 54303

RECEIVED DNR
AUG 23 1976
Lake Mich. Dist.

Dear Mr. Dahlstrand:

This letter is to acknowledge receipt, in response to Order Number 2A-75-1045A, of the hydrogeological report for the proposed Lehrer landfill expansion located in Sections 21, 22, T21N, R18E, Town of Buchanan, Outagamie County by the Bureau of Air and Solid Waste Management on August 13, 1976.

You will be informed in the near future of the status of review.

The construction of improvements covered by these plans may not proceed until the approval in writing has been received by the municipality or owner.

If you have any questions, please contact Mr. Robert T. Glebs at 608-266-7055.

Sincerely,
Bureau of Air and Solid Waste Management

SUBJECT: Jim Lehrer's Landfill Site

Recently this writer and Terry Gardon inspected the Lehrer landfill site to determine if it was operating in compliance with their license. Our inspection was made at approximately 2:00 p.m. on August 3, 1976. There was serious question if he was covering on a daily basis. Therefore, Terry inspected the site at 6:15 p.m. that evening and at 6:15 a.m. the following morning. As a result of these inspections it was determined that solid waste was not being compacted and completely covered after every day of operation.

Presently Mr. Lehrer is being sued by the Attorney General's office for failing to operate a sanitary landfill in conformance with the codes. Would you please notify the Attorney General's office that the violations are continuing.

Gary F. Kulibert
Solid Waste Mgt. Coordinator

Mr. Ken Schoenike, City Engineer
City of Kaukauna
Kaukauna, Wisconsin 54130

Dear Mr. Schoenike:

On August 3, 1976, I inspected the Lehrer landfill site and adjacent area off of 20th Street to determine if leachates were surfacing. We noted an area where water was coming through the side of the hill in a steady stream. This water was tested for specific conductivity. A reading of 4000 was observed. This is a good indication of contaminated water. Right now it's only speculation but it appears that these materials may be leachates from the Lehrer landfill site.

Presently, our Department is in the process of trying to obtain a hydrogeologic report on Mr. Lehrer's landfill site. Once this report is submitted, our Department will be in a better position to determine if these materials are coming from the Lehrer landfill site and possibly how the situation can be corrected.

Very truly yours,

Gary F. Kulibert
